DATA ANALYST

Analytical professional specializing in exploratory data analysis and statistical modeling, currently pursuing a Master of Science in Business Analytics. Proficient in Python and R, with hands-on experience applying data analysis techniques in cybersecurity and laboratory research settings. Combines a strong foundation in statistical theory with proven problem-solving and communication skills, consistently translating complex data into clear, actionable insights for technical and non-technical audiences alike.

EDUCATION

Wake Forest University School of Business, Winston-Salem, NC
Master of Science in Business Analytics, May 2027

The University of North Carolina – Wilmington, Wilmington, NC
Bachelor of Science in Cybersecurity, December 2025

The University of North Carolina at Charlotte, Charlotte, NC
Bachelor of Science in Computer Science, August 2023

AREAS OF EXPERTISE

Leadership | Problem-Solving | Written Communication | Business Communication | Time Management | Data Visualization
Statistical Analysis | Active Listening | Communicating Data Findings | Verbal Communication | Cross-Functional Collaboration
Incident Response & Investigation | Process Optimization | Technical Threat & Risk Analysis | Quality Assurance & Compliance
Technical Reporting & Documentation | Asset & Data Management

TECHNICAL SKILLS

Programming Languages: Python, R, Java
Data Analysis & Experimental Design: Exploratory Data Analysis (EDA)
Analytical Software & Tools: Excel (Beginner)
Google Cloud (GCP): Collaboratory

PROFESSIONAL EXPERIENCE

INTERN, CYBERSECURITY | **Carolina Cyber Center** | Montreat, NC January 2025 – May 2025

- Applied key penetration testing frameworks (such as OWASP Top 10 and PTES) to identify, analyze, and exploit vulnerabilities across simulated network environments using tools like Nmap, Wireshark, and Metasploit.
- Conducted root-cause analysis on simulated cybersecurity incidents, documenting attack vectors and drafting comprehensive incident response reports with actionable mitigation strategies.
- Performed vulnerability assessments and penetration tests across 15+ complex lab environments, generating detailed risk-assessment reports that highlighted critical security flaws and recommended patch strategies.

INTERN, LABORATORY | **Algal Resources Collection** | Wilmington, NC January 2025 – April 2025

- Supported ongoing algae research through precise preparation of growth media and sterile laboratory glassware maintenance.
- Designed and implemented a standardized labeling and tracking system for 20+ algae cultures, significantly improving visibility and workflow coordination among lab members.
- Cataloged and retrieved specimen cultures within the lab’s specialized culture room, guaranteeing 100% data integrity and organized tracking.
