

DATA ANALYST

Analytical professional specializing in exploratory data analysis and statistical modeling, currently pursuing a Master of Science in Business Analytics. Proficient in Python and R, with hands-on experience applying data analysis techniques in cybersecurity and laboratory research settings. Combines a strong foundation in statistical theory with proven problem-solving and communication skills, consistently translating complex data into clear, actionable insights for technical and non-technical audiences alike.

EDUCATION

Wake Forest University School of Business, Winston-Salem, NC
Master of Science in Business Analytics, May 2027

The University of North Carolina - Wilmington, Wilmington, NC
Bachelor of Science in Cybersecurity, December 2025

The University of North Carolina at Charlotte, Charlotte, NC
Bachelor of Science in Computer Science, August 2023

AREAS OF EXPERTISE

Leadership | Problem-Solving | Written Communication | Business Communication | Time Management | Data Visualization
Statistical Analysis | Active Listening | Communicating Data Findings | Verbal Communication | Cross-functional Collaboration
Incident Response & Investigation | Process Optimization | Technical Threat and Risk Analysis | Quality Assurance & Compliance
Technical Reporting & Documentation | Asset & Data Management

TECHNICAL SKILLS

Programming Languages: Python, R, Java
Data Analysis & Experimental Design: Exploratory Data Analysis (EDA)
Analytical Software & Tools: Excel (Beginner)
Google Cloud (GCP): Colaboratory

PROFESSIONAL EXPERIENCE

- INTERN, CYBERSECURITY | Carolina Cyber Center | Montreat, NCJanuary 2025 – May 2025
 - Mastered core cybersecurity analysis and penetration testing methodologies, conducting vulnerability assessments to identify and mitigate network security risks.
 - Engineered incident response protocols to investigate, analyze, and document security breaches, delivering comprehensive threat reports for risk remediation.
- INTERN, LABORATORY | Algal Resources Collection | Wilmington, NCJanuary 2024 – April 2024
 - Supported ongoing algae research through the precise preparation of growth media and sterile laboratory glassware maintenance.
 - Designed and implemented a standardized labeling and tracking system for 20+ algae cultures, significantly improving inventory visibility and workflow coordination among lab members.
 - Cataloged and retrieved specimen cultures within the lab’s specialized culture room, guaranteeing 100% data integrity and organized tracking.
